

Robot

Robot that eats the trash

robots that compact trash

Robot that burns trash

robots that clean oil spills

Ocean clean up

Develop and deploy trash collection nets in stormwater drains

Barriers in rivers that block oncoming trash

Encourage the use of non-toxic cleaning products and alternatives to harmful chemicals.

Enhance oil spill response capabilities to minimize the impact of oil spills

ban plastic bags

Promote the development and use of biodegradable

Community service

Support businesses that use minimal or plastic-free packaging

Create mobile apps that help consumers locate businesses that promote plastic-free and sustainable products.

Get volunteers to help out

campaigns for people to donate

community services to clean up trash

raise public awareness

Pressure corporations to reduce their plastic packaging and encourage sustainable practices throughout their supply chain

Funding

Reach out to companies to get funding

Create a gofundme "to fight plastic pollution"

Recycle

Expand recycling programs to reduce the disposal of hazardous materials into water bodies.

More places to recycle in third world countries

More signs telling people not to litter

more paper products

regulate putting harmful chemical in the ocean

Increase the use of green infrastructure
